- Casablanca - Morocco (Flexible)

PROFILE

Software engineer specialized in front-end development with expertise in Vue.js, Next.js, and Web3 technologies. Experienced in designing and optimizing high-performance, responsive applications that enhance user experience and code maintainability. Skilled in agile teamwork and delivering reliable solutions in collaborative environments. Seeking a challenging role to contribute to innovative and scalable projects.

SKILLS

- Problem Solving: Debugging and resolving complex issues
- Collaboration: Working in cross-functional teams, peer support
- Project Management: Agile methodologies, Scrum
- Communication: Effective written and verbal communication skills

EDUCATION

Engineering degree in Computer Engineering and Networks.

Ecole Marocaine Des Sciences De l'Ingénieur - EMSI

2018 - 2023

LANGUAGES

English: C1 - IELTS
French: C1 - TCF
Arabic: Native
German: Beginner (learning)

TECHNICAL SKILLS

- Languages: JavaScript, TypeScript, HTML, CSS
- Frameworks and Libraries: Vue.js, Next.js, Web3.js, Cypress
- State Management: Vuex, Pinia
- UI Libraries: Element Plus, Bootstrap, Tailwind CSS
- Tools and Technologies: Git, Webpack, RESTful APIs, GraphQL, npm, Docker
- Development Practices: Agile methodologies (Scrum), Responsive Design, Cross-Browser Compatibility, Code Reviews
- Blockchain: Experience with blockchain development and decentralized applications (dApps)

WORK EXPERIENCE

Front-End Developer

Forvis Mazars

July 2023 - Present

- Developed and maintained dynamic web applications using Vue.js, significantly improving both performance and user experience.
- Successfully contributed to five major projects and am currently leading development on the sixth, consistently ensuring timely delivery and high-quality code.
- Collaborated with cross-functional teams to design and implement new features that enhance product functionality and drive user engagement.
- Utilized Vuex and Pinia for robust state management and leveraged Element Plus for UI components, creating seamless and responsive designs across various devices.
- Implemented Cypress testing across multiple projects, increasing test coverage and ensuring reliable, automated validation of critical user flows and functionality.
- Debugged and resolved complex front-end issues, enhancing the overall stability and performance of applications.
- Implemented responsive design principles to create mobile-friendly web applications, leading to an increase in mobile user engagement.
- Conducted code reviews and provided mentorship to junior developers, fostering a collaborative and productive team environment.
- Assisted coworkers with troubleshooting and completing their tasks, promoting a collaborative and supportive work environment.
- Developed reusable components and optimized code to improve development efficiency and maintainability.
- Lead communications with clients for projects I'm responsible for.

Front-End Developer Intern

March 2023 - July 2023

FeverTokens

- Developed a blockchain wallet using Next.js, TypeScript, and Web3.js, facilitating secure and efficient transactions for users.
- Revamped an outdated codebase, significantly enhancing developer experience (DX) and improving the overall user interface and user experience (UI/UX), resulting in a more intuitive application.
- Contributed to the development of a console project enabling users to create custom web3 marketplaces, expanding the platform's functionality.
- Actively collaborated with team members on design and implementation decisions, ensuring cohesive and well-integrated solutions.
- Provided proactive support and assistance to team members, fostering a collaborative environment and contributing to the overall success of projects.
